

BIRKDALE CAST PATTERN CABIN HOOK

CODES PREFIXES: 136 & 541

DESCRIPTION

These cast pattern cabin hooks are designed to retain gates and doors in the open position. It is recommended that the eye is secured to the back of the door or gate and the hook is attached to the side of the building or a secure anchor point.

- Available in lengths from 100mm to 250mm
- Oval back plate
- Available in three finishes – hot dipped Galv, Epoxy Black and Premium Black

CONSTRUCTION

Manufactured from mild steel.

GALVANISED:

Coated in accordance with BS/EN ISO 1461:2009. The average coating thickness is 45 microns. The GateMate versions come with galvanised bolts and Silver Ruspert screws which have 1000 NSS. If the product is fitted correctly and the surface finish is not damaged the service life of 15 years can be expected.

PREMIUM BLACK:

Is a durable superior finish coated on steel products (Polyester coating on hot dipped galvanised).

BLACK POLYESTER COATING:

Polyester powder coating is a type of coating that is applied as a free-flowing dry powder. The powder is a thermoset polymer, which is used to create a hard finish that is tougher than conventional paint. Powder coating is mainly used for the coating and protection of metals. Polyester Powder Coatings offer durable decorative finishes in a wide range of colours, textures, and gloss levels. They are formulated to provide maximum corrosion resistance, colour stability and gloss retention. They are suitable for interior and exterior use and entirely T.G.I.C free (triglycidyl isocyanate crosslinkers).

All items are coated in accordance with BS-13438.

The service life for Premium Black coating is 15 years.
